

About the Coronavirus COVID-19

People have been talking about the coronavirus called COVID-19.

COVID-19 is a germ that people cannot see with their eyes.

Germs like COVID-19 make people feel sick.

All people can prevent germs like COVID-19 from spreading.

These are things I will do so I do not get sick:

I will wash my hands when I walk into my house or program.

I will wash my hands before I eat food.

I will wash my hands after I use the bathroom.

I will wash my hands before I touch my face.

I will cough or sneeze into a tissue, then throw the tissue in the trash and then wash my hands.

I will stay away from sick people.

I will clean things around me like tables and computers and doorknobs.

I will tell someone when I feel sweaty or out of breath.

The doctor will help me get better if I get sick.
